

Program Review Process (PRP)

The Program Review Process ensures that the college responds to the changing needs of its students and community.

The Program Review Committee (PRC):

- reviews all Integrated Program Reviews;
- creates a yearly report to College Council and the Budget Committee identifying common themes, issues, resource requests, and priorities from that year's reviews;
- provides a list of strategies for departments to use in completing both the annual and integrated program reviews;
- provides a list of questions to guide the PRP; and
- provides training for all.
