STUDY SESSION ASSIGNMENT

There will be a group study session during the lab on the date indicated in your syllabus. The assignment below is worth 10 points. Failure to complete the assignment will result in loss of the privilege of extra credit.

ASSIGNMENT: Every student will be given a topic that will be covered on the next exam. Each student must submit 7 copies of the following: three detailed essay questions on their topic, along with complete answers to each question; OR an outline of the lecture material in your own words (not a copy of your lecture notes). The assignment must be typed. If an answer or outline involves a diagram, the diagram may be hand-written, but must be legible, easy to understand, and then accompanied by a typed explanation.

MY TOPIC IS _________________________________________________

PURPOSE OF ASSIGNMENT: This assignment provides for study time before the review session. You will come into the session as an expert on at least one topic. The study session will allow for collaborative learning, and provide immediate access to the instructor for questions. If requested, the instructor will also provide review for topics of special concern to students.
