Spring 2014
Course Information

Elementary Probability/Statistics: Math B22
  o CRN #31439  meets from 6:00 pm to 8:30 pm TR in MS 106
  o CRN #31438  meets from 4:20 pm to 5:30 pm MTWR in MS 106

Textbook Tips
  o You may want to order your textbook online or rent one.
  o International versions of the textbook are also a cheaper option.
  o Try dealoz.com, amazon.com or do a Google search for college textbooks to get the best prices if you prefer to buy.
  o To rent a textbook, check out chegg.com.
  o You do not need the MyStatsLab, or the CD that comes with some of the books for this course since we will not be using either of them.
  o The ISBN number may be different on the international versions or other versions that come with software. Just make sure you get the correct title, author and edition of the book and you should be fine.

Class Materials:

1. 3-Ring Binder with paper→ You will use a binder to organize your notes and homework.

2. Graphing Calculator→ A TI-83 or TI-84 plus is required for this course and will be used on a regular basis. These calculators sell for around $100. You can rent one from BC for only $10. There is a limited supply of graphing calculators to rent at BC so, do not procrastinate!

   Instructions for Renting a Calculator from BC
   1. You go to the Business Office (same building as the BC Bookstore) and pay $10.
   2. They will give you a voucher that you can take to the Media Center (downstairs in the BC Library by the students' computer stations).
   3. Show the voucher to the Media Center person and then get the calculator.

   **CAUTION**

   If you choose to use another model or type of graphing calculator other than the TI-83 or 84, you are on your own. We will be using several programs for the TI-83/84 that will not work on other TI models. Also, I am most familiar with the TI-83/84 models, and the notes for the class are geared for that kind of calculator.

3. Pencils→ You must use regular pencil on any exam that is given.
